CRITICAL STUDIES ON FOOD IN ITALY - FOOD SYSTEMS AND SUSTAINABILITY – SUMMER OPEN ENROLLMENT PROGRAM

Italy has long been seen as one of the cradles of Western culture. This takes on a new meaning and deeper significance when students have the option to experience, in consecutive programs over the same summer or in subsequent ones, Italian food systems and sustainability in contrast to those of Vietnam or Japan. This program assists students in understanding the role of food in human cultures as well as the range of choices and values implicit in the foods eaten in Italy and elsewhere. Based in the heart of historic Rome — only minutes from the Vatican, the Colosseum and the Pantheon — this five-week program introduces participants to the on-site exploration of the interdisciplinary field of food studies. While staying in nearby apartments, students can take up to three academic courses taught by local professors and instructors. Each course is complemented by regular excursions into Rome or other areas of Italy. Students are encouraged to keep journals and to engage in ethnographic research projects. All courses are conducted in English.

DURATION: 5-week Full Immersion Program

WHEN: May 20 – June 22, 2019

WHERE: ROME, ITALY

COURSES OFFERED

Critical Studies on Food (3 credits)

Food Media, Communication and Trends (3 credits)

WHAT ALUMNI SAY ABOUT THEIR EXPERIENCE AT GUSTOLAB INTERNATIONAL

Gustolab International not only allowed me to gain valuable applied experience and knowledge on Italian culture, but also gave me a completely new perspective on the connections between food, sustainability, and society.
