

FoodTech IL 2018 - Tel Aviv

Tel Aviv is hosting 3 major events this week highlighting Israeli innovation in the food and agriculture industries.

Thanks to the invitation of Israel-Italy Chamber of Commerce and Industry, we will be part of the Italian delegation.

The events will start on May 6th with FoodTech FastTrack Tel Aviv by Startupbootcamp FoodTech, in partnership with The Kitchen Hub, FoodTechIL and PeakBridge Partners, where the best foodtech startups will be receiving mentoring.

On May 7th, we will be at FoodTech IL 2018 which brings together all the relevant stakeholders in the FoodTech space. The topic for this year's event will be innovation and technologies in the Food & Beverage sector.

On May 8th, we will be at Agritech 2018 which will focus on efforts and achievements of policy makers, scientists, industries, organizations, farmers, project companies and bankers, working to overcome desert barriers, expand food sources and to "push the envelope" of agricultural limits.
