

Course Descriptions

Below are course descriptions for GLi's open enrollment programs.

Fall Program - Italy

NUTRITION AND THE MEDITERRANEAN DIET

Nutrition and Food Culture presents an analysis of the Mediterranean diet as found in current-day Italy. It focuses on consumption patterns and their impact on health and well-being. Topics include taste preferences, food aversions, hunger and satiety, food as comfort and friendship, eating as a social ritual, and the social norms of blame for food problems. The politics of food is examined focusing on sustainable agriculture, organic farming, genetically modified foods, nutrition policy, and the influence of food and agriculture industries. Malnutrition, eating disorders, and obesity, as well as the impact of food advertising, and the ways in which personal food choice is shaped by our modern environment are examined.

Credit Recommendation: 200~300 level, social science discipline, history, or nutrition.

Open to: All majors

SUSTAINABLE DEVELOPMENT GOALS: SUSTAINABILITY & FOOD SYSTEMS

Sustainable Food Systems in Italy takes an interdisciplinary and comparative approach to understanding sustainable agriculture and food in Italy. Combining in-class teaching, fieldwork and study tours Food Systems helps students acquire the knowledge and skills for developing sustainable farming systems. Field trips focus on sustainability initiatives in Lazio region, among others. Readings and lectures link the ecology of the Italian peninsula with the profound role food plays in Italian communities, families, and national identity.

Credit Recommendation: 200-300 level, social science discipline

Open to: All majors

SUSTAINABLE FOOD BUSINESS AND MARKETING IN ITALY

Sustainable Food Business and Marketing provides a foundation, within the Italian context, of core concepts in food business, including management, finance, economics, sales, marketing, human resource management, and supply chain management. Emphasis is placed on the Italian — and the European — food markets. This course will be of particular interest to students exploring a career in food marketing, import/export markets, and food hospitality and tourism.

Credit Recommendation: 200~300 level, social science discipline, agricultural science, or business

Open to: All majors

FOOD PRODUCTION: OLIVE OIL AND WINE

Food Production: Olive Oil and Wine focuses on two of Italy's signature products – as they are being produced in sites across Italy. Emphasis is placed on the local production of these crops and the processes transforming them into market commodities. Discussions and readings are situated within historical, cultural and economic contexts. Students participate in two forms of fieldwork. They assist in harvesting and related activities at nearby farms. They also accompany their instructor on an educational tour, from Northern to Southern Italy, of farms and markets exploring local production processes.

Credit Recommendation: 200~300 level, social science discipline, agricultural science, business.

Open to: All majors

ITALIAN LANGUAGE COURSES (FROM ELEMENTARY TO ADVANCED LEVEL)

GLi collaborates with the Scuola Leonardo da Vinci Rome to provide the Italian Language courses. Courses are applicable toward most U.S. Universities' language requirement. Higher levels of Italian language and Italian Conversation courses are available. Please contact us to receive more information on this. Courses are available at multiple levels depending on prior study or background.

Credit Recommendation: 100-400 level Italian Language, Language Studies or related disciplines.

Open to: All majors

ITALIAN LANGUAGE FOR FOOD STUDIES

This course will be for students without any knowledge of the Italian language. This course aims to teach technical terms, vocabulary and words used in the specialized field of study and research of the Food Studies. Students will be able to analyze product packaging, advertising campaigns, but also scientific resources in Italian language. The teacher will help the students to identify the Italian words used in the field of Food Studies. This course will also include basic knowledge and skills of grammar, to help students to easily interact with native speakers.

Credit Recommendation: 100-400 level Italian Language, Language Studies or related disciplines. The course gives 3 credits.

Open to: All majors

Spring Program - Italy

FOOD AND CULTURE IN ITALY

The course will examine Italian food (as a complex system) from the historical, political, economic, cultural, and culinary perspectives. Students will start with a general introduction to Italy and Italian food and wine with an emphasis on regional traditions. They will also examine contemporary issues, such as the success of the Mediterranean diet, food production, distribution, and consumption. Wine and specific food products, both artisanal and mass-produced, will be tasted and discussed, and their cultural signification evaluated.

Open to: All majors

FOOD AND MEDIA

The course will focus on the intersection between food and media, a connection that has elicited much interest in communication studies over the past few years. Food has become a hot topic on TV, the Internet and the printed media. The goal of this course is to enhance the students' competence both on the subject matter and in the practical skills necessary to produce good communication about food and wine. This is a multi-faceted course that will give students a solid foundation in understanding Italy's unique media environment as well as the opportunity to utilize Rome (and Italy)

as a living laboratory for producing a final video product. Students will complete an original video research project about food paradoxes.

Open to: All majors

LAYERS OF ROME

The course will study the way in which Rome developed as a cultural center of world significance through its monuments and works of art. Rome's archaeological sites, monuments and architecture are stratified, and the layers of successive epochs remain visible. Through visits and field trips, students will be able to explore how familiar symbolic means have been employed to either reinforce or subvert established ideas and how certain sites, statues or even blocks of stone, have been invested with multiple layers of meaning by successive generations.

Open to: All majors

CONTEMPORARY ITALY: CULTURE AND SOCIETY

This course aims to give an overall image of contemporary Italian society through the analysis of general aspects such as language, family, politics, religion, interaction between economic and social progress. Stereotypes and clichés related to Italian culture will be analyzed and challenged. The main goal of the course will be to deliver an up-to-date approach to a wide range of topics shaping the contemporary Italian culture stimulating a fruitful confrontation with the original culture of the participants.

Open to: All majors

ITALIAN LANGUAGE FOR FOOD STUDIES

This course will be for students without any knowledge of the Italian language. This course aims to teach technical terms, vocabulary and words used in the specialized field of study and research of the Food Studies. Students will be able to analyze product packaging, advertising campaigns, but also

scientific resources in Italian language. The teacher will help the students to identify the Italian words used in the field of Food Studies. This course will also include basic knowledge and skills of grammar, to help students to easily interact with native speakers.

Credit Recommendation: 100-400 level Italian Language, Language Studies or related disciplines. The course gives 3 credits.

Open to: All majors

ITALIAN LANGUAGE COURSES (FROM ELEMENTARY TO ADVANCED LEVEL)

GLi collaborates with the Scuola Leonardo da Vinci Rome to provide the Italian Language courses. Courses are applicable toward most U.S. Universities' language requirement. Higher levels of Italian language and Italian Conversation courses are available. Please contact us to receive more information on this. Courses are available at multiple levels depending on prior study or background. Information on an introductory course stressing food related vocabulary — the Lexicon for Food Studies — is available upon request.

Credit Recommendation: 100-400 level Italian Language, Language Studies or related disciplines.

Open to: All majors

Summer Program - Italy

CRITICAL STUDIES ON FOOD

This course combines traditional lectures and discussion meetings with hands-on co-curricular activities and field trips in and around Rome, as well as in the Lazio region and Cilento's seaside. Food is presented in all its complex connections with culture, nutrition, environment, society, economics and politics. All course topics are accompanied by practical activities, ranging from classes in professional kitchens to food and wine pairing and tasting workshops. Lectures are delivered by prestigious experts for each topic, providing a dynamic and interdisciplinary learning environment. Practical assignments allow students to explore and experience first-hand food culture in the streets of Rome.

Credits: 3 credits

Credit Recommendation: 200-300 level food studies, anthropology or related disciplines.

Open to: All majors

FOOD MEDIA, COMMUNICATION AND TRENDS

This course focuses on the intersection between food and media. In recent years food has become a hot topic on TV, the internet, and printed media. The goal of this course is to enhance the students' competence both on food and media and in the practical skills necessary to produce effective communication about food, wine and related topics. Students learn through hands-on practice with different kinds of media, including digital video. This multi-faceted course gives students a solid foundation in understanding Italy's unique media environment as well as the opportunity to utilize Rome (and Italy) as a living laboratory for producing a final portfolio of journalistic writings. Students also complete an original video research project (a documentary production) based on student interests. Guest lecturers include local and international journalists, writers and bloggers.

Credits: 3 credits

Credit Recommendation: 200-300 level food studies, media studies, advertising or related disciplines.

Open to: All majors

FOOD, NUTRITION AND CULTURE IN ITALY

This course focuses on how culture and ethnicity affect dietary practices, with particular emphasis on Italy as compared to the U.S. The influence of politics on food availability and food practices is explored. Emphasis is on cross-cultural communication processes to address nutrition and cultural issues. Classes will include lectures presenting new material, but will also heavily focus on in-class discussions pulling together field experiences lectures and site visits.

Credits: 3 credits

Credit Recommendation: 200-300 level food studies, nutrition studies, anthropology or related disciplines.

Open to: All majors

FOOD AND CITIES: SDGS IN ITALY WITH A FOCUS ON FOOD WASTE

In Italy, food is celebrated, and many Italians cite the pleasure of eating and sharing meals as core cultural values. However, even with its long history of attention to regional and national cuisine, and veneration to taste and authenticity of food, less attention has been paid to the fact that a great deal (around 14.5 billion USD) of food goes unused. The Italian government is hoping to change this phenomenon. A recent (2016) Italian law requires that markets donate “usable” food to reduce waste and feed hungry people. In this course, students will study these issues by analyzing current research, conducting fieldwork, and looking at current implementation of the law. Students will work (through interviews, observation, and partnerships with community recovery agencies) to analyze where, when, why and how the line is drawn between food and food waste in Rome and the impacts and consequences of these categories.

Credits: 3 credits

Open to: All majors

ITALIAN LANGUAGE FOR FOOD STUDIES

This course will be for students without any knowledge of the Italian language. This course aims to teach technical terms, vocabulary and words used in the specialized field of study and research of the Food Studies. Students will be able to analyze product packaging, advertising campaigns, but also scientific resources in Italian language. The teacher will help the students to identify the Italian words used in the field of Food Studies. This course will also include basic knowledge and skills of grammar, to help students to easily interact with native speakers.

Credits: 3 credits

Credit Recommendation: 100-400 level Italian Language, Language Studies or related disciplines.

Open to: All majors

ELEMENTARY ITALIAN LANGUAGE OR INTENSIVE ELEMENTARY ITALIAN LANGUAGE

GLi collaborates with the Scuola Leonardo da Vinci Rome to provide the Italian Language courses. Higher levels of Italian language and Italian Conversation courses are available. Please contact us to receive more information on this. No prerequisites for the Elementary Italian Language or Intensive Elementary Italian Language courses.

Credits: Elementary Italian Language - ITALIAN 110: 3 credits

Intensive Elementary Italian Language (minimum of 8 participants) - ITALIAN 126: 6 credits

Open to: All majors

Summer Program - Japan

THE STORY OF FOOD IN OSAKA: A FIELD STUDY

This course has three goals. It will introduce participants to: (1) Approaching Osaka, its citizens, institutions, and surrounding areas as a text for learning about the story of food. To do this we will borrow experiential fieldwork methods from anthropology and other disciplines - methods designed to facilitate your entry and understanding of a second culture (keeping a journal, working with key informants, pursuing fieldwork questions, and reflecting on experience....). (2) Our study will be framed by the critical concepts of food systems and sustainability. These dynamic ideas link many forms of social action with academic reflection in today's world. They shape pressing issues ranging from health and nutrition to rising sea levels and the reshaping of human geography. We will look at how Osaka - and Japan - is responding to these challenges. (3) And finally, we will explore the story of food in Osaka, one of the world's great urban areas. This story will include the foodways of current Osaka as well as the role of food in Osaka and Japan's development. Topics include: local and national markets, the UN's sustainable development goals (SDG), Osaka's gateway role vis a vis Asia, and the changing rural community, among others. All participants will stay with host families and we will have field visits to markets, a soy sauce factory, a knife manufacturing facility, as well as a rural village and farming community

Credits: 3 credits

Open to: All majors

JAPANESE CULINARY PRACTICES AND THE SENSIBLE WORLD

Japan is known worldwide for its food and culture, but its historical trajectory including the era of militaristic imperialism and post-WWII occupation, and strong nationalism shape and produce various food issues and politics in Japan. This class explores and experiences both a foundational philosophy and an unsettled boundary of *washoku* as 'national' cuisine by examining culinary objects, technique, and symbolic meanings in Japan. *Washoku*, literally means Japanese food ("wa" = Japanese, "shoku" = food). While *Washoku* is now one of the foods registered by UNESCO as intangible cultural heritages, the term '*Washoku*' has deeper and broader cultural meanings, and its boundary has never been fixed. The class aims to understand the change and diversity of Japanese food cultures in time and space. This course revolves around multi-sensory practical activities, spending significant time in a food studies kitchen for preparing and tasting Japanese cuisine. Students are required to attend both lecture and culinary training. Students will have the opportunity to learn both home-style cooking and restaurant-style Japanese haute cuisine.

Credits: 3 credits

Open to: All majors

JAPANESE LEXICON FOR FOOD AND BUSINESS

Description coming soon

Credits: 1-2 credits

Summer Program - Vietnam

PADDY RICE PRODUCTION IN VIETNAM

Description coming soon

Credits: 3 credits

Open to: All majors
