

INT 101 Academic Internship (Onsite)

Research Project Briefing

The student will work with the Learning Facilitator and Academic Supervisor to develop a line of research regarding their internship expectations and goals, to enrich the internship placement. These may include:

- visits
- meetings with experts
- readings

Students will work on a specific project in the sector to which they are assigned. Objectives, expectations and expected results for the project (advertising campaign, research project, educational plan for schools, a design for a new product, a comparison between USA and Italy, etc.) will be designed taking into consideration the intern's academic interests and the social, ethical, business or sustainability challenges facing the field site. In some cases, this project can be a continuation of work students have done on their home campuses.
